Introduction

Index Objective

The VettaFi American Future of Defence Index tracks the market performance of American companies, listed on U.S. exchanges that provide exposure to NATO defense and cyber-defense spending.

Highlights

The Index uses a modified free float market capitalization weighting algorithm.

Dates

Reference Dates: Same as Weight Date.

Reconstitution Dates: Indexes reconstitute quarterly on the COB of the fourth Tuesday in January, April, July, and October.

Weight Date: Five trading days prior to the Rebalance/Reconstitution Date.

Rebalance Dates: Indexes rebalance quarterly on the COB of the fourth Tuesday in January, April, July, and October.

Supporting Documents

This methodology is meant to be read in conjunction with supporting documents providing greater detail with respect to the policies, procedures and calculations described herein.

The list of the main supplemental documents for this methodology can be found in the Methodologies and Governance tabs on the [Index Resources](#) page as follows:

Index Change and Consultation Policy
Index Fast Track IPO Policy

Eligibility Criteria and Index Construction

Universe

U.S listed equities of companies headquartered and/or domiciled in the United States.

Index Construction

Constituent Selection

The top 50¹ companies by company free float market cap that meet the following requirements are selected:

- Minimum Thematic Exposure: Constituent business operations must derive more than 50% of their revenues from the manufacture and development of military aircraft and/or defense equipment (military armored vehicles & tanks, weapon systems and missiles, munitions and accessories, electronics & mission systems, and naval ships), defense technology applications, or cyber security contracting with a NATO member nation verified by publicly available contract information.
- ESG/Human Rights Filter: Constituent business operations must comply with United Nations Global Compact (UNGC) principles and Organization for Economic Cooperation (OECD) Guidelines for Multinational Enterprises².
- Market Cap of 1 Billion USD
- 10% Free Float
- 3-month Average Daily Traded Value (ADTV) of 1 million USD

In the event of less than 50 eligible companies, only eligible companies are selected.

Constituent Weightings & Constraints³

Constituents are free-float market cap weighted with the following caps:

- Constituent weighting needs to accommodate the ability to trade 25% of 25 million USD while not exceeding the constituents 90-day ADTV.
- Issuer weights are capped at 5%.
- Issuer weights are floored at 0.2%
- The cumulative weight of all constituents representing more than 4.5% of the index cannot exceed 40%.
- The Cyber Security segment is capped at 20% of the total index weight.

Excess weights are redistributed proportionally among the rest of the uncapped and unfloored securities. This redistribution is repeated iteratively until all capping conditions are met.

¹ In the case that two or more securities are tied for the last position of the ranking, the security with the highest 3-month ADTV is selected for inclusion.

² UNGC and OECD screens are defined by the Index provider using data from a third-party rating company.

Index Maintenance

Rebalancing and Reconstitution

The Indexes are rebalanced on the “Rebalance Date” and additionally reconstituted on the “Reconstitution Date”. Pricing used in share weights used for reconstitutions are as of the “Weight Date”. Share weights for the rebalanced Indexes are computed as of the “Weight Date”. Changes to the Indexes related to the rebalances are as of the “Rebalance Date”. Additions are only made on reconstitution dates.

Fast Track Inclusion

Newly listed companies (IPO’s) that would rank in the top 50% of current constituents by full company market cap are eligible for early inclusion. Implementation details are outlined in the Index Fast Track IPO Policy.

Corporate Actions

Please refer to the Index Maintenance Policy document for information on Corporate Action processing.

Index Information

Index history availability, base dates and base values are shown in the table below.

Index	Price Index	Base Date	Base Value	Net Total Return Index	Base Date	Base Value
VettaFi American Future of Defence Index	USDFS	01/23/2018	1000	USDFSN	01/23/2018	1000

Methodology Updates and Changes

Date	Version	Previous	New
May 2026	1.0.0		Initial Version
Jun 2026	1.1.0	- Free Float 20%	- Free Float 10% - Added Fast Track Inclusion section

Index Calculation

Please refer to the Index Maintenance Policy document for information on index calculations.

Index Governance

The index is governed and administered by a VettaFi Index Committee for the purpose of meeting the goals of the index. For more information, please refer to the Index Governance document.

Index Policies

Please refer to the Index Policies document for information regarding Announcements, Holiday Schedules, Unexpected Exchange Closures, and Recalculation Policy.
