Annualized 3 Year:	19.6%
Annualized 5 Year:	10.2%
Annualized 10 Year:	17.4%
Standard Deviation:	16.6%
Sharpe Ratio:	0.96

A proprietary, rules-based index drawing from The Motley Fool's analyst/newsletter "recommendation universe." Securities are ranked by an equal-weighted Capital Efficiency Composite made of three normalized sub-scores, each built on gross profits-to-assets (GPOA): Profitability (the five-year average level of GPOA), Growth (the five-year average of year-over-year changes in quarterly GPOA), and Stability (the five-year standard deviation of year-over-year changes in trailing-twelve-month GPOA, where less variability scores higher). The 100 highest-ranked constituents are weighted by blending their market caps and composite scores. The index is rebalanced quarterly.

Performance of $1,000 invested
